AHA Annual Survey
Health Forum, L.L.C.

HOSPITAL NAME: ________________________________

CITY, STATE: ________________________________

Please return to:
AHA Annual Survey
155 N Wacker Drive
Suite 400
Chicago IL 60606

A. REPORTING PERIOD (please refer to the instructions and definitions at the end of this questionnaire)
Report data for a full 12-month period, preferably your last completed fiscal year (366 days). Be consistent in using the same reporting period for responses throughout various sections of this survey.

1. Reporting Period used (beginning and ending date) …… __ __ / __ __ / __ __ __ __ to __ __ / __ __ / __ __ __ __

2. a. Were you in operation 12 full months at the end of your reporting period? …………………… YES ☐ NO ☐
b. Number of days open during reporting period …… __________

3. Indicate the beginning of your current fiscal year ……… __ __ / __ __ / __ __ __ __

B. ORGANIZATIONAL STRUCTURE

1. CONTROL
Indicate the type of organization that is responsible for establishing policy for overall operation of your hospital. CHECK ONLY ONE:

Government, nonfederal
☐ 12 State
☐ 13 County
☐ 14 City
☐ 15 City-County
☐ 16 Hospital district or authority

Nongovernment, not-for-profit (NFP)
☐ 21 Church-operated
☐ 23 Other not-for-profit (including NFP Corporation)

Investor-owned, for-profit
☐ 31 Individual
☐ 32 Partnership
☐ 33 Corporation

Government, federal
☐ 41 Air Force
☐ 42 Army
☐ 43 Navy
☐ 44 Public Health Service
☐ 45 Veterans’ Affairs
☐ 46 Federal other than 41-45 or 47-48
☐ 47 PHS Indian Service
☐ 48 Department of Justice

2. SERVICE
Indicate the ONE category that BEST describes your hospital or the type of service it provides to the MAJORITY of patients:

☐ 10 General medical and surgical
☐ 11 Hospital unit of an institution (prison hospital, college infirmary)
☐ 12 Hospital unit within a facility for persons with intellectual disabilities
☐ 13 Surgical
☐ 22 Psychiatric
☐ 33 Tuberculosis and other respiratory diseases
☐ 41 Cancer
☐ 42 Heart
☐ 44 Obstetrics and gynecology
☐ 45 Eye, ear, nose, and throat
☐ 46 Rehabilitation
☐ 47 Orthopedic
☐ 48 Chronic disease
☐ 62 Intellectual disabilities
☐ 80 Acute long-term care hospital
☐ 82 Alcoholism and other chemical dependency
☐ 49 Other - specify treatment area: _____________________
B. ORGANIZATIONAL STRUCTURE (continued)

3. OTHER
   a. Does your hospital restrict admissions primarily to children? ………………………………….. YES □ NO □
   b. Does the hospital itself operate subsidiary corporations? ……………………………………….. YES □ NO □
   c. Is the hospital contract managed? If yes, please provide the name, city, and state of the organization… YES □ NO □
      Name: __________________________  City: _________________________  State: _____________
   d. Is the hospital a participant in a network? …………………………………………………………YES □ NO □
      If yes, please provide the name, city, state and telephone number of the network(s).
      Name: __________________________  City: _________________________  State: ______  Telephone_____________________
      Name: __________________________  City: _________________________  State: ______  Telephone_____________________
      Name: __________________________  City: _________________________  State: ______  Telephone_____________________ 
   e. Is your hospital owned in whole or in part by physicians or a physician group? ......................YES □ NO □
   f. If you checked 80 Acute long-term care hospital (LTCH) in Section B2 (Service), please indicate if you are a freestanding LTCH or a LTCH arranged within a general acute care hospital.
      □ Free standing LTCH  □ LTCH arranged in a general acute care hospital
      If you are arranged in a general acute care hospital, what is your host hospital’s name?
      Name: __________________________  City: _________________________  State: ______

## C. FACILITIES AND SERVICES

For each service or facility listed below, please check all the categories that describe how each item is provided as of the last day of the reporting period. Check all categories that apply for an item. If you check column (1) C1-19, please include the number of staffed beds.

*The sum of the beds reported in 1-19 should equal Section D(1b), beds set up and staffed on page 9.*

#### 104. Looking across all the relationships identified in question 103, what is the total number of physicians (count each physician only once) that are engaged in an arrangement with your hospital that allows for joint contracting with payors or shared responsibility for financial risk or clinical performance between the hospital and physician? (arrangement may be at the hospital, system or network level) # of physicians _____________

#### 105a. Does your hospital participate in any joint venture arrangements with physicians or physician groups?  
YES ☐ NO ☐

#### 105b. If your hospital participates in any joint ventures with physicians or physician groups, please indicate which types of services are involved in those joint ventures. (Check all that apply)

1. ☐ Limited service hospital
2. ☐ Ambulatory surgical centers
3. ☐ Imaging centers
4. ☐ Other

#### 105c. If you selected ‘a. Limited service hospital’, please tell us what type(s) of services are provided. (Check all that apply)

1. ☐ Cardiac
2. ☐ Orthopedic
3. ☐ Surgical
4. ☐ Other

#### 105d. Does your hospital participate in joint venture arrangements with organizations other than physician groups?  
YES ☐ NO ☐
C. FACILITIES AND SERVICES (continued)

106a. Has your hospital or health care system established an accountable care organization (ACO)?

Yes □ No □

106b. If yes, please indicate the patient population that participates in the ACO. (Check all that apply)

1. □ Medicaid
2. □ Medicare
3. □ Privately insured
4. □ Other, please specify ____________________

107. Does your hospital have an established medical home program?

Yes □ No □

108. Does your hospital participate in a bundled payment program involving inpatient, physician, and/or post-acute care services where the hospital receives a single payment from a payor for a package of services and then distributes payments to participating providers of care (such as a single fee for hospital and physician services for a specific procedure, e.g., hip replacement, CABG)?

Yes □ No □

109. Does your hospital, health system or health network have an equity interest in any of the following insurance products? (Check all that apply)

Contractual relationships with HMOs and PPOs should not be reported here but in Question 112. Column 3 refers to the networks that were identified in section B, question 3d.

110. Does your hospital have a formal written contract that specifies the obligations of each party with:

a. Health maintenance organization (HMO) 

Yes □ No □

b. Preferred provider organization (PPO) 

Yes □ No □

c. Preferred provider organization (PPO) 

Yes □ No □

d. Preferred provider organization (PPO) 

Yes □ No □

111. What percentage of the hospital’s net patient revenue is paid on a capitated basis?

If the hospital does not participate in capitated arrangements, please enter “0”

_________ %

112. What percentage of the hospital’s net patient revenue is paid on a shared risk basis?

_________ %

113. Does your hospital contract directly with employers or a coalition of employers to provide care on a capitated, predetermined, or shared risk basis?

Yes □ No □

114. If your hospital has arrangements to care for a specific group of enrollees in exchange for a capitated payment, how many lives are covered?

_________

115. Does your hospital have contracts with commercial payors where payment is tied to performance on quality/safety metrics? Yes □ No □

116a. Does your hospital conduct an internal survey of the hospital’s quality/safety culture at least every 18 months?

Yes □ No □

116b. If yes, please indicate the response rate for the most recent survey.

_______ %

116c. If yes, are valid results available at the level of individual units (e.g., medical ICUs, cardiothoracic surgery)?

Yes □ No □
D. TOTAL FACILITY BEDS, UTILIZATION, FINANCES, AND STAFFING

Please report beds, utilization, financial, and staffing data for the 12-month period that is consistent with the period reported on page 1. Report financial data for reporting period only. Include within your operations all activities that are wholly owned by the hospital, including subsidiary corporations regardless of where the activity is physically located. Please do not include within your operations distinct and separate divisions that may be owned by your hospital’s parent corporation. If final figures are not available, please estimate. Round to the nearest dollar. Report all personnel who were on the payroll and whose payroll expenses are reported in D3f. (Please refer to specific definitions on pages 21-23.)

9. INFORMATION TECHNOLOGY

*a. IT operating expense................................................................. 00
*b. IT capital expense................................................................. 00
*c. Number of employed IT staff (in FTEs)........................................
*d. Number of outsourced IT staff (in FTEs)....................................

10. STAFFING

Report full-time (35 hours or more) and part-time (less than 35 hours) personnel who were on the hospital/facility payroll at the end of your reporting period. Include members of religious orders for whom dollar equivalents were reported. Exclude private-duty nurses, volunteers, and all personnel whose salary is financed entirely by outside research grants. Exclude physicians and dentists who are paid on a fee basis. FTE is the total number of hours worked by all employees over the full (12 month) reporting period divided by the normal number of hours worked by a full-time employee for that same time period. For example, if your hospital considers a normal workweek for a full-time employee to be 40 hours, a total of 2,080 would be worked over a full year (52 weeks). If the total number of hours worked by all employees on the payroll is 208,000, then the number of Full-Time Equivalents (FTE) is 100 (employees). The FTE calculation for a specific occupational category such as registered nurses is exactly the same. The calculation for each occupational category should be based on the number of hours worked by staff employed in that specific category.

For each occupational category, please report the number of staff vacancies as of the last day of your reporting period. A vacancy is defined as a budgeted staff position which is unfilled as of the last day of the reporting period and for which the hospital is actively seeking either a full-time or part-time permanent replacement. Personnel who work in more than one area should be included only in the category of their primary responsibility and should be counted only once.

Use this space for comments or to elaborate on any information supplied on this survey. Refer to the response by page, section and item name.
As declared previously, hospital specific revenue data are treated as confidential. AHA’s policy is not to release these data without written permission from your institution. The AHA will however, share these data with your respective state hospital association and if requested with your appropriate metropolitan/regional association.

On occasion, the AHA is asked to provide these data to external organizations, both public and private, for their use in analyzing crucial health care policy or research issues. The AHA is requesting your permission to allow us to release your confidential data to those requests that we consider legitimate and worthwhile. In every instance of disclosure, the receiving organization will be prohibited from releasing hospital specific information.

Please indicate below whether or not you agree to these types of disclosure:

[ ] I hereby grant AHA permission to release my hospital’s revenue data to external users that the AHA determines have a legitimate and worthwhile need to gain access to these data subject to the user’s agreement with the AHA not to release hospital specific information.

SECTION A
REPORTING PERIOD
Instructions

INSTRUCTIONS AND DEFINITIONS FOR THE 2016 ANNUAL SURVEY OF HOSPITALS.
For purposes of this survey, a hospital is defined as the organization or corporate entity licensed or registered as a hospital by a state to provide diagnostic and therapeutic patient services for a variety of medical conditions, both surgical and nonsurgical.

1. Reporting period used (beginning and ending date): Record the beginning and ending dates of the reporting period in an eight-digit number: for example, January 1, 2016 should be shown as 01/01/2016. Number of days should equal the time span between the two dates that the hospital was open. If you are reporting for less than 366 days, utilization and finances should be presented for days reported only.

2. Were you in operation 12 full months at the end of your reporting period? If you are reporting for less than 366 days, utilization and finances should be presented for days reported only.

3. Number of days open during reporting period: Number of days should equal the time span between the two dates that the hospital was open.

SECTION B
ORGANIZATIONAL STRUCTURE
Instructions and Definitions

1. CONTROL
Check the box to the left of the type of organization that is responsible for establishing policy for overall operation of the hospital.

   Government, nonfederal.
   - State. Controlled by an agency of state government.
   - County. Controlled by an agency of county government.
   - City. Controlled by an agency of municipal government.
   - City-County. Controlled jointly by agencies of municipal and county governments.

   Nongovernment, not for profit. Controlled by not-for-profit organizations, including religious organizations (Catholic hospitals, for example), community hospitals, cooperative hospitals, hospitals operated by fraternal societies, and so forth.

   Investor owned, for profit. Controlled on a for profit basis by an individual, partnership, or a profit making corporation.

   Government, federal. Controlled by an agency or department of the federal government.

2. SERVICE
Indicate the ONE category that best describes the type of service that your hospital provides to the majority of patients.

   General medical and surgical. Provides diagnostic and therapeutic services to patients for a variety of medical conditions, both surgical and nonsurgical.

   Hospital unit of an institution. Provides diagnostic and therapeutic services to patients in a institution.

   Hospital unit within a facility for persons with intellectual disabilities. Provides diagnostic and therapeutic services to persons with intellectual disabilities.

   Surgical. An acute care specialty hospital where 2/3 or more of its inpatient claims are for surgical/diagnosis related groups.

   Psychiatric. Provides diagnostic and therapeutic services to patients with mental or emotional disorders.

   Tuberculosis and other respiratory diseases. Provides medical care and rehabilitative services to patients for whom the primary diagnosis is tuberculosis or other respiratory diseases.

   Cancer. Provides medical care to patients for whom the primary diagnosis is cancer.

   Heart. Provides diagnosis and treatment of heart disease.

   Obstetrics and gynecology. Provides medical and surgical treatment to pregnant women and to mothers following delivery. Also provides diagnostic and therapeutic services to women with diseases or disorders of the reproductive organs.

   Eye, ear, nose, and throat. Provides diagnosis and treatment of diseases and injuries of the eyes, ears, nose, and throat.

   Rehabilitation. Provides a comprehensive array of restoration services for people with disabilities and all support services necessary to help them attain their maximum functional capacity.

   Orthopedic. Provides corrective treatment of deformities, diseases, and ailments of the locomotive apparatus, especially affecting the limbs, bones, muscles, and joints.

   Chronic disease. Provides medical and skilled nursing services to patients with long-term illnesses who are not in an acute phase, but who require an intensity of services not available in nursing homes.

   Intellectual Disabilities. Provides health-related care on a regular basis to patients with developmental or intellectual disabilities who cannot be treated in a skilled nursing unit.

   Acute long-term care hospital. Provides high acuity interdisciplinary services to medically complex patients that require more intensive recuperation and care than can be provided in a typical nursing facility.

   Alcoholism and other chemical dependency. Provides diagnostic and therapeutic services to patients with alcoholism or other drug dependencies.

3. OTHER
   a. Children admissions. A hospital whose primary focus is the health and treatment of children and adolescents.
   b. Subsidiary. A company that is wholly controlled by another or one that is more than 50% owned by another organization.
   c. Contract managed. General day-to-day management of an entire organization by another organization under a formal contract. Managing organization reports directly to the board of trustees or owners of the managed organization; managed organization retains total legal responsibility and ownership of the facility’s assets and liabilities.
   d. Network. A group of hospitals, physicians, other providers, insurers and/or community agencies that voluntarily work together to coordinate and deliver health services.
SECTION C

FACILITIES AND SERVICES

Definitions

Owned/provided by the hospital or its subsidiary. All patient revenues, expenses and utilization related to the provision of the service are reflected in the hospital's statistics reported elsewhere in this survey.

Provided by my Health System (in my local community). Another health care provider in the same system as your hospital provides the service and patient revenue, expenses, and utilization related to the provision of the service are recorded at the point where the service was provided and would not be reflected in your hospital’s statistics reported elsewhere in this survey. (A system is a corporate body that owns, leases, religiously sponsors and/or manages health providers.

Provided through a formal contractual arrangement or joint venture with another provider that is not in my system. All patient revenues and utilization related to the provision of the service are recorded at the site where the service was provided and would not be reflected in your hospital statistics reported elsewhere in this survey. (A joint venture is a contractual arrangement between two or more parties forming an unincorporated business. The participants in the arrangement remain independent and separate outside of the venture’s purpose.)

1. General medical-surgical care. Provides acute care to patients in medical and surgical units on the basis of physicians’ orders and approved nursing care plans.

2. Pediatric medical-surgical care. Provides acute care to pediatric patients on the basis of physicians’ orders and approved nursing care plans.

3. Obstetrics. For service owned or provided by the hospital, level should be designated: (1) unit provides services for uncomplicated maternity and newborn cases; (2) unit provides services for uncomplicated cases, the majority of complicated problems, and special neonatal services; and (3) unit provides services for all serious illnesses and abnormalities and is supervised by a full-time maternal/fetal specialist.

4. Medical-surgical intensive care. Provides patient care of a more intensive nature than the usual medical and surgical care, on the basis of physicians’ orders and approved nursing care plans. These units are staffed with specially trained nursing personnel and contain monitoring and specialized support equipment for patients who because of shock, trauma or other life-threatening conditions require intensified comprehensive observation and care. Includes mixed intensive care units.

5. Cardiac intensive care. Provides patient care of a more specialized nature than the usual medical and surgical care, on the basis of physicians’ orders and approved nursing care plans. The unit is staffed with specially trained personnel and contains monitoring and specialized support or treatment equipment for patients who, because of heart seizure, open-heart surgery, or other life-threatening conditions, require intensified, comprehensive observation and care. May include myocardial infarction, pulmonary care, and heart transplant units.

6. Neonatal intensive care. A unit that must be separate from the newborn nursery providing intensive care to all sick infants including those with the very lowest birth weights (less than 1500 grams). NICU has potential for providing mechanical ventilation, neonatal surgery, and special care for the sickest infants born in the hospital or transferred from another institution. A full-time neonatologist serves as director of the NICU.

7. Neonatal intermediate care. A unit that must be separate from the normal newborn nursery and that provides intermediate and/or recovery care and some specialized services, including immediate resuscitation, intravenous therapy, and capacity for prolonged oxygen therapy and monitoring.

8. Pediatric intensive care. Provides care to pediatric patients that is of a more intensive nature than that usually provided to pediatric patients. The unit is staffed with specially trained personnel and contains monitoring and specialized support equipment for treatment of patients who, because of shock, trauma, or other life-threatening conditions, require intensified, comprehensive observation and care.

9. Burn care. Provides care to severely burned patients. Severely burned patients are those with any of the following: (1) second-degree burns of more than 25% total body surface area for adults or 20% total body surface area for children; (2) third-degree burns of more than 10% total body surface area; (3) any severe burns of the hands, face, eyes, ears, or feet; or (4) all inhalation injuries, electrical burns, complicated burn injuries involving fractures and other major traumas, and all other poor risk factors.

10. Other special care. Provides care to patients requiring care more intensive than that provided in the acute area, yet not sufficiently intensive to require admission to an intensive care unit. Patients admitted to this area are usually transferred here from an intensive care unit once their condition has improved. These units are sometimes referred to as definitive observation, step-down or progressive care units.

11. Other intensive care. A specially staffed, specially equipped, separate section of a hospital dedicated to the observation, care, and treatment of patients with life-threatening illnesses, injuries, or complications from which recovery is possible. It provides special expertise and facilities for the support of vital function and utilizes the skill of medical nursing and other staff experienced in the management of these problems.

12. Psychiatric care. Provides care encompassing a comprehensive array of restoration services for people with disabilities and all support services necessary to help patients attain their maximum functional capacity.

13. Alcoholism-drug abuse or dependency care. Provides diagnosis and therapeutic services to patients with alcoholism or other drug dependencies.

14. Psychiatric care. Provides acute or long-term care to patients with mental or emotional disorders, including patients admitted for diagnosis and those admitted for treatment of psychiatric disorders, on the basis of physicians’ orders and approved nursing care plans. Long-term care may include any chronic or acute condition which is not limited to one organ system or condition or functional disability.

15. Skilled nursing care. Provides non-acute medical and skilled nursing care services, therapy, and social services under the supervision of a licensed registered nurse on a 24-hour basis.

16. Intermediate nursing care. Provides health-related services (skilled nursing care and social services) to residents with a variety of physical conditions or functional disabilities. These residents do not require the care provided by a hospital or skilled nursing facility, but do need supervision and support services.

17. Acute long-term care. Provides specialized acute hospital care to medically complex patients who are critically ill, have multisystem complications, require failure, and require hospitalization averaging 25 days, in a facility offering specialized treatment programs and therapeutic intervention on a 24-hour/7 days a week basis.

18. Other long-term care. Provision of long-term care other than skilled nursing care or intermediate care for those who do not require daily medical or nursing services, but may require some assistance in the activities of daily living. This can include residential care, elderly care, or care facilities for those with developmental or intellectual disabilities.

19. Other care. (specify Any type of care other than those listed above.

The sum of the beds reported in Section C 1-19 should equal what you have reported in Section D(1b) for beds set up and staffed.

20. Adult day care program. Program providing supervision, medical and psychological care, and social activities for older adults who live at home or in another family setting, but cannot be alone or prefer to be with others during the day. May include intake assessment, health monitoring, occupational therapy, personal care, noon meal, and transportation services.

21. Airborne infection isolation room. A single-occupancy room for patient care where environmental factors are controlled in an effort to minimize the transmission of those infectious agents, usually spread person to person by droplet nuclei associated with coughing and inhalation. Such rooms typically have specific ventilation requirements for controlled ventilation, air pressure and filtration.

22. Alcoholism-drug abuse or dependency outpatient services. Organized hospital services that provide medical care and/or rehabilitative treatment services to outpatients for whom the primary diagnosis is alcoholism or other chemical dependency.
23. **Alzheimer center.** Facility that offers care to persons with Alzheimer's disease and their families through an integrated program of clinical services, research, and education.

24. **Ambulance services.** Provision of ambulance service to the ill and injured who require medical attention on a scheduled and unscheduled basis.

25. **Ambulatory surgery center.** Facility that provides care to patients requiring surgery that are admitted and discharged on the same day.

26. **Arthritis treatment center.** Specifically equipped and staffed center for the diagnosis and treatment of arthritis and other joint disorders.

27. **Assisted living.** A special combination of housing, supportive services, personalized assistance and care designed to respond to the individual needs of community-dwelling persons who need help in activities of daily living and instrumental activities of daily living. Supportive services are available, 24 hours a day, to meet scheduled and unscheduled needs. In a way that promotes maximum independence and dignity for each resident and encourages the involvement of a resident’s family, neighbor and friends.

28. **Auxiliary.** A volunteer community organization formed to assist the hospital in carrying out its purpose and to serve as a link between the institution and the community.

29. **Bariatric/weight control services.** The medical practice of weight reduction.

30. **Birthing room/DRP room.** A single-room type of maternity care with a more homelike setting for families than the traditional three-room unit (labor/delivery/recovery) with a separate postpartum area. A birthing room combines labor and delivery in one room. An LDR room accommodates three stages in the birthing process -- labor, delivery, and recovery. An LDRP room accommodates all four stages of the birth process -- labor, delivery, recovery, and postpartum.

31. **Blood donor center.** A facility that performs, or is responsible for the collection, processing, testing or distribution of blood and components.

32. **Breast cancer screening/mammograms.** Mammography screening - The use of breast x-ray to detect unsuspected breast cancer in asymptomatic women. Diagnostic mammography - The x-ray imaging of breast tissue in symptomatic women who are considered to have a substantial likelihood of having breast cancer already.

33. **Cardiology and cardiac surgery services.** Services which include the diagnosis and treatment of diseases and disorders involving the heart and circulatory system.
   a-b. **Cardiology services.** An organized clinical service offering diagnostic and interventional procedures to manage the full range of heart conditions.
   c-d. **Diagnostic catheterization.** (also called coronary angiography or coronary arteriography) is used to assist in diagnosing complex heart conditions. Cardiac angiography involves the insertion of a tiny catheter into the artery in the groin then carefully threading the catheter up into the aorta where the coronary arteries originate. Once the catheter is in place, a dye is injected which allows the cardiologist to see the size, shape, and distribution of the coronary arteries. These images are used to diagnose heart disease and to determine, among other things, whether or not surgery is indicated.
   e-f. **Interventional cardiac catheterization.** Nonsurgical procedure that utilizes the same basic principles as diagnostic catheterization and then uses advanced techniques to improve the heart’s function. It can be a less invasive alternative to heart surgery.
   g-h. **Cardiac surgery.** Includes minimally invasive procedures that include surgery done with only a small incision or no incision at all, such as through a laparoscope or an endoscope and more invasive major surgical procedures that include open chest and open heart surgery.
   i-j. **Cardiac electrophysiology.** Evaluation and management of patients with complex rhythm or conduction abnormalities, including diagnostic testing, treatment of arrhythmias by catheter ablation or drug therapy, and pacemaker/defibrillator implantation and follow-up.
   k. **Cardiac rehabilitation.** A medically supervised program to help heart patients recover quickly and improve their overall physical and mental functioning. The goal is to reduce risk of another cardiac event or to keep an already present heart condition from getting worse. Cardiac rehabilitation programs include: counseling to patients, an exercise program, helping patients modify risk factors such as smoking and high blood pressure, providing vocational guidance to enable the patient to return to work, supplying information on physical limitations and lending emotional support.

34. **Case management.** A system of assessment, treatment planning, referral and follow-up that ensures the provision of comprehensive and continuous services, and the coordination of payment and reimbursement for care.

35. **Chaplaincy/pastoral care services.** A service ministering religious activities and providing pastoral counseling to patients, their families, and staff of a health care organization.

36. **Chemotherapy.** An organized program for the treatment of cancer by the use of drugs or chemicals.

37. **Children’s wellness program.** A program that encourages improved health status and a healthful lifestyle of children through health education, exercise, nutrition and health promotion.

38. **Chiropractic services.** An organized clinical service including spinal manipulation or adjustment and related diagnostic and therapeutic services.

39. **Computer assisted orthopedic surgery (CAOS).** Orthopedic surgery using computer technology, enabling three-dimensional graphic models to visualize a patient’s anatomy.

40. **Continuous emotional support.** Services which provide care to patients requiring surgery that are admitted and discharged on the same day.

41. **Emergency services.** Health services that are provided after the onset of a medical condition that manifests itself by symptoms of sufficient severity, including severe pain, that the absence of immediate medical attention could reasonably be expected by a prudent layperson, who possesses an average knowledge of health and medicine, to result in placing the patient’s health in serious jeopardy.

42. **Emergency department.** Hospital facilities for the provision of unscheduled outpatient services to patients whose conditions require immediate care.

43. **Dental Services.** An organized dental service or dentists on staff, not necessarily involving special facilities, providing dental or oral services to inpatients or outpatients.

44. **Emergency services.** Health services that are provided after the onset of a medical condition that manifests itself by symptoms of sufficient severity, including severe pain, that the absence of immediate medical attention could reasonably be expected by a prudent layperson, who possesses an average knowledge of health and medicine, to result in placing the patient’s health in serious jeopardy.

45. **Enabling services.** A program that is designed to help the patient access health care services by offering any of the following: transportation services and/or referrals to local social services agencies.
46. **Endoscopic services.**
   a. **Optical colonoscopy.** An examination of the interior of the colon using a long, flexible, lighted tube with a small built-in camera.
   b. **Endoscopic ultrasound.** Specially designed endoscope that incorporates an ultrasound transducer used to obtain detailed images of organs in the chest and abdomen. The endoscope can be passed through the mouth or the anus. When combined with needle biopsy the procedure can assist in diagnosis of disease and staging of cancer.
   c. **Ablation of Barrett’s esophagus.** Premalignant condition that can lead to adenocarcinoma of the esophagus. The nonsurgical ablation of premalignant tissue in Barrett’s esophagus by the application of thermal energy or light through an endoscope passed from the mouth into the esophagus.
   d. **Esophageal impedance study.** A test in which a catheter is placed through the nose into the esophagus to measure whether gas or liquids are passing from the stomach into the esophagus and causing symptoms.
   e. **Endoscopic retrograde cholangiopancreatography (ERCP).** A procedure in which a catheter is introduced through an endoscope into the bile ducts and pancreatic ducts. Injection of contrast material permits detailed x-ray of these structures. The procedure is used diagnostically as well as therapeutically to relieve obstruction or remove stones.

47. **Health (Insurance) assistance services.** A program that provides enrollment assistance for patients who are potentially eligible for public health insurance programs such as Medicaid, State Children’s Health Insurance, or local/state indigent care programs. The specific services offered could include explanation of benefits, assist applicants in completing the application and locating all relevant documents, conduct eligibility interviews, and/or forward applications and documentation to state/local social service or health agency.

48. **Extracorporeal shock wave lithotripter (ESWL).** A medical device used for treating stones in the kidney or urethra. The device disintegrates kidney stones noninvasively through the transmission of acoustic shock waves directed at the stones.

49. **Fertility clinic.** A specialized program set in an infertility center that provides counseling and education as well as advanced reproductive techniques such as: injectable therapy, reproductive surgeries, treatment for endometriosis, male factor infertility, tubal reversal surgery, in vitro fertilization (IVF), donor eggs, and other such services to help patients achieve successful pregnancies.

50. **Fitness center.** Provides exercise, testing, or evaluation programs and fitness activities to the community and hospital employees.

51. **Freestanding outpatient care center.** A facility owned and operated by the hospital, that is physically separate from the hospital and provides various medical treatments and diagnostic services on an outpatient basis only. Laboratory and radiology services are usually available.

52. **Geriatric services.** The branch of medicine dealing with the physiology of aging and the diagnosis and treatment of disease affecting the aged. Services could include: Adult day care; Alzheimer’s diagnostic-assessment services; Comprehensive geriatric assessment; Emergency response system; Geriatric acute care unit; and/or Geriatric clinics.

53. **Health fair.** Community health education events that focus on the prevention of disease and promotion of health through such activities as audiovisual exhibits and free diagnostic services.

54. **Community health education.** Education that provides health information to individuals and populations as well as support for personal, family and community health decisions with the objective of improving health status.

55. **Genetic testing/counseling.** A service equipped with adequate laboratory facilities and directed by a qualified physician to advise patients on potential genetic diagnosis of vulnerabilities to inherited diseases. A genetic test is the analysis of human DNA, RNA, chromosomes, proteins, and certain metabolites in order to detect heritable disease-related genotypes, mutations, phenotypes, or karyotypes for clinical purposes. Genetic tests can have diverse purposes, including the diagnosis of genetic diseases in newborns, children, and adults; the identification of future health risks; the prediction of drug responses; and the assessment of risks to future children.

56. **Health screening.** A preliminary procedure such as a test or examination to detect the most characteristic sign or signs of a disorder that may require further investigation.

57. **Health research.** Organized hospital research program in any of the following areas: basic research, clinical research, community health research, and/or research on innovative health care delivery.

58. **Hemodialysis.** Provision of equipment and personnel for the treatment of renal insufficiency on an inpatient or outpatient basis.

59. **HIV/AIDS services.** Diagnosis, treatment, continuing care planning, and counseling services for HIV/AIDS patients and their families. Could include: HIV/AIDS unit, special unit or designated team, general inpatient care, or specialized outpatient program.

60. **Home health services.** Service providing nursing, therapy, and health-related homemaker or social services in the patient’s home.

61. **Hospice.** A program providing palliative care, chiefly medical relief of pain and supportive services, addressing the emotional, social, financial, and legal needs of terminally ill patients and their families. Care can be provided in a variety of settings, both inpatient and at home.

62. **Hospital-based outpatient care center-services.** Organized hospital health care services offered by appointment on an ambulatory basis.

63. **Immunization program.** Program that plans, coordinates and conducts immunization services in the community.

64. **Indigent care clinic.** Health care services for uninsured and underinsured persons where care is free of charge or charged on a sliding scale. This would include “free clinics” staffed by volunteer practitioners, but could also be staffed by employees with the sponsoring health care organization subsidizing the cost of service.

65. **Linguistic/translation services.** Services provided by the hospital designed to make health care more accessible to non-English speaking patients and their physicians.

66. **Meals on wheels.** A hospital sponsored program which delivers meals to people, usually the elderly, who are unable to prepare their own meals. Low cost, nutritional meals are delivered to individuals’ homes on a regular basis.

67. **Mobile health services.** Vans and other vehicles used for delivery to primary care services.

68. **Neurological services.** Services provided by the hospital dealing with the operative and nonoperative management of disorders of the central, peripheral, and autonomic nervous systems.

69. **Nutrition programs.** Services within a health care facility which are designed to provide inexpensive, nonemotional, or specialized outpatient program.

70. **Oncology services.** Inpatient and outpatient services for patients with cancer, including comprehensive care, support and guidance in addition to patient education and prevention, chemotherapy, counseling and other treatment methods.

71. **Orthopedic services.** Services provided for the prevention or correction of injuries or disorders of the skeletal system and associated muscles, joints and ligaments.

72. **Outpatient surgery.** Scheduled surgical services provided to patients who do not remain in the hospital overnight. The surgery may be performed in operating suites also used for inpatient surgery, specially designated surgical suites for outpatient surgery, or procedure rooms within an outpatient care facility.

73. **Pain management program.** A recognized clinical service or program providing specialized medical care, drugs or therapies for the management of acute or chronic pain and other distressing symptoms, administered by specially trained physicians and other clinicians, to patients suffering from acute illnesses of diverse causes.

74. **Palliative care program.** An organized program providing specialized medical care, drugs or therapies for the management of acute or chronic pain and/or the control of symptoms administered by specially trained physicians and other clinicians; and supportive care services, such as counseling on advanced directives, spiritual care, and social services, to patients with advanced diseases and their families.
76. Palliative care inpatient unit. An inpatient palliative care ward is a physically discreet, inpatient nursing unit where the focus is palliative care. The patient care focus is on symptom relief for complex patients who may be continuing to undergo primary treatment. Care is delivered by palliative medicine specialists.

77. Patient controlled analgesia (PCA). Intravenously administered pain medicine under the patient’s control. The patient has a button on the end of a cord than can be pushed at will, whenever more pain medicine is desired. This button will only deliver more pain medicine at predetermined intervals, as programmed by the doctor’s order.

78. Patient education center. Written goals and objectives for the patient and/or family related to therapeutic regimens, medical procedures, and self-care.

79. Patient representative services. Organized hospital services providing personnel through whom patients and staff can seek solutions to institutional problems affecting the delivery of high quality care and services.

80. Physical rehabilitation services. Program providing medical, health-related, therapy, social, and/or vocational services to help people with disabilities attain or retain their maximum functional capacity.
   a. Assistive technology center. A program providing access to specialized hardware, software and with adaptations allowing individuals greater independence with mobility, dexterity, or increased communication options.
   b. Electrodiagnostic services. Diagnostic testing services for nerve and muscle function such as nerve conduction studies and needle electromyography.
   c. Physical rehabilitation outpatient services. Outpatient program providing medical, health-related, therapy, social, and/or vocational services to help people with disabilities attain or retain their maximum functional capacity.
   d. Prosthetic and orthotic services. Services providing comprehensive prosthetic and orthotic evaluation, fitting, and training.
   e. Robot-assisted walking therapy. A form of physical therapy that uses a robotic device to assist patients who are relearning how to walk.
   f. Simulated rehabilitation environment. Rehabilitation focused on retraining functional skills in a contextually appropriate environment (simulated home and community settings) or in a traditional setting (gymnasium) using motor learning principles.

81. Primary care department. A unit or clinic within the hospital that provides primary care services (e.g., general pediatric care, general internal medicine, family practice, gynecology) through hospital-salaried medical and/or nursing staff, focusing on evaluating and diagnosing medical problems and providing medical treatment on an outpatient basis.

82. Psychiatric services. Services provided by the hospital that offer immediate initial evaluation and treatment to patients with mental or emotional disorders.
   a. Psychiatric child-adolescent services. Provides care to children and adolescents with mental or emotional disorders, including those admitted for diagnosis and those admitted for treatment.
   b. Psychiatric consultation liaison services. Provides organized psychiatric consultation liaison services to nonpsychiatric hospital staff and/or departments on psychological aspects of medical care that may be generic or specific to individual patients.
   c. Psychiatric education services. Provides psychiatric educational services to community agencies and workers such as schools, police, courts, public health nurses, welfare agencies, clergy, and so forth. The purpose is to expand the mental health knowledge and competence of personnel not working in the mental health field and to promote good mental health through improved understanding, attitudes, and behavioral patterns.
   d. Psychiatric emergency services. Services of facilities available on a 24-hour basis to provide immediate unscheduled outpatient care, diagnosis, evaluation, crisis intervention, and assistance to persons suffering acute emotional or mental distress.
   e. Psychiatric geriatric services. Provides care to elderly patients with mental or emotional disorders, including those admitted for diagnosis and those admitted for treatment.
   f. Psychiatric outpatient services. Provides medical care, including diagnosis and treatment, of psychiatric outpatients.
   g. Psychiatric partial hospitalization program. Organized hospital services providing intensive day/evening outpatient services of three hours or more duration, distinguished from other outpatient visits of one hour.
   h. Psychiatric residential treatment. Overnight psychiatric care in conjunction with an intensive treatment program in a setting other than a hospital.

83. Radiology, diagnostic. The branch of radiology that deals with the utilization of all modalities of radiant energy in medical diagnoses and therapeutic procedures using radiologic guidance. This includes, but is not restricted to, imaging techniques and methodologies utilizing radiation emitted by x-ray tubes, radionuclides, and ultrasonographic devices and the radiofrequency electromagnetic radiation emitted by atoms.
   a. CT Scanner. Computed tomographic scanner for head or whole body scans.
   b. Diagnostic radiosotope facility. The use of radioactive isotopes (Radiopharmaceuticals) as tracers or indicators to detect an abnormal condition or disease.
   c. Electron beam computed tomography (EBCT). A high tech computed tomography scan used to detect coronary artery disease by measuring coronary calcifications. This imaging procedure uses electron beams which are magnetically steered to produce a visual of the coronary artery and the images are produced faster than conventional CT scans.
   d. Full-field digital mammography (FFDM). Combines the x-ray generators and tubes used in analog screen-film mammography (SFM) with a detector plate that converts the x-rays into a digital signal.
   e. Magnetic resonance imaging (MRI). The use of a uniform magnetic field and radio frequencies to study tissue and structure of the body. This procedure enables the visualization of biochemical activity of the cell in vivo without the use of ionizing radiation, radiosotopic substances or high-frequency sound.
   f. Intraoperative magnetic resonance imaging. An integrated surgery system which provides an MRI system in an operating room. The system allows for immediate evaluation of the degree to tumor resection while the patient is undergoing a surgical resection. Intraoperative MRI exists when a MRI (low-field or high-field) is placed in the operating theater and is used during surgical resection without moving the patient from the operating room to the diagnostic imaging suite.
   g. Magnetoencephalography (MEG). A noninvasive neurophysiological measurement tool used to study magnetic fields generated by neuronal activity of the brain. MEG provides direct information about the dynamics of evoked and spontaneous neural activity and its location in the brain. The primary uses of MEG include assist surgeons in localizing the source of epilepsy, sensory mapping, and the study of brain function. When it is combined with structural imaging, it is known as magnetic source imaging (MSI).
   h. Multi-slice spiral computed tomography (>64+slice CT). A specialized computed tomography procedure that provides three-dimensional processing and allows narrower and multiple slices with increased spatial resolution and faster scanning times as compared to a regular computed tomography scan.
   i. Multi-slice spiral computed tomography (64+ slice CT). Involves the acquisition of volumetric tomographic x-ray absorption data expressed in Hounsfield units using multiple rows of detectors. 64+ systems reconstruct the equivalent of 64 or more slices to cover the imaged volume.
   j. Positron emission tomography (PET). A nuclear medicine imaging technology which uses radioactive (positron emitting) isotopes created in a cyclotron and combines imaging and radionuclide uptake to produce composite pictures of the brain and heart at work. PET scanning produces sectional images depicting metabolic activity or blood flow rather than anatomy.
   k. Positron emission tomography/CT (PET/CT). Provides metabolic functional information for the monitoring of chemotherapy, radiotherapy and surgical planning.
   l. Single photon emission computerized tomography (SPECT). A nuclear medicine imaging technology that combines existing technology of gamma camera imaging with computed tomographic imaging technology to provide a clearer and more precise image.
m. Ultrasound. The use of acoustic waves above the range of 20,000 cycles per second to visualize internal body structures.

84. Radiology, therapeutic. The branch of medicine concerned with radioactive substances and using various techniques of visualization, with the diagnosis and treatment of disease using any of the various sources of radiant energy. Services could include: megavoltage radiation therapy; radioactive implants; stereotactic radiosurgery; therapeutic radionuclide therapy; X-ray radiation therapy.

a. Image-guided radiation therapy (IGRT). Automated system for image-guided radiation therapy that enables clinicians to obtain high-resolution x-ray images to pinpoint tumor sites, adjust patient positioning when necessary, and complete a treatment, all within the standard treatment time slot, allowing for more effective cancer treatments.

b. Intensity-Modulated Radiation Therapy (IMRT). A type of three-dimensional radiation therapy which improves treatment delivery by targeting a tumor in a way that is likely to decrease damage to normal tissues and allows for varying intensities.

c. Proton beam therapy. A form of radiation therapy which administers proton beams. While producing the same biologic effects as x-ray beams, the energy distribution of protons differs from conventional x-ray beams: proton beams can be more precisely focused in tissue volumes in a three-dimensional pattern, resulting in less surrounding tissue damage than conventional radiation therapy, permitting administration of higher doses.

d. Shaped beam radiation system. A precise, noninvasive treatment that involves targeted beams of radiation that mirror the exact size and shape of a tumor at a specific area to shrink or destroy cancerous cells. This procedure delivers a therapeutic dose of radiation that conforms precisely to the shape of the tumor, thus minimizing the risk of damage to surrounding normal tissues.

e. Stereotactic radiosurgery. A radiosurgery modality that delivers a high dosage of radiation to a discrete treatment area in as few as one treatment session. Includes Gamma Knife, Cyberknife, etc.

85. Retirement housing. A facility that provides social activities to senior citizens, usually retired persons, who do not require health care but some short-term skilled nursing care may be provided. A retirement center may furnish housing and may also have acute hospital and long-term care facilities, or it may arrange for acute and long-term care through affiliated institutions.

86. Women's center. The use of mechanical guidance devices to remotely manipulate surgical instrumentation.

87. Rural health clinic. A clinic located in a rural, medically under-served area in the United States that has a separate reimbursement structure from the standard medical office under the Medicare and Medicaid programs.

88. Sleep center. Specially equipped and staffed center for the diagnosis and treatment of sleep disorders.

89. Social work services. Could include: organized services that are properly directed and sufficiently staffed by qualified individuals who provide assistance and counseling to patients and their families in dealing with social, emotional, and environmental problems associated with illness or disability, often in the context of financial or discharge planning coordination.

91. Support groups. A hospital sponsored program that allows a group of individuals with common experiences or issues who meet periodically to share experiences, problems, and solutions in order to support each other.

92. Swing bed services. A hospital bed that can be used to provide either acute or long-term care depending on community or patient needs. To be eligible a hospital must have a Medicare provider agreement in place, have fewer than 100 beds, be located in a rural area, not have a 24-hour nursing service waiver in effect, have not been terminated from the program in the prior two years, and meet various service conditions.

93. Teen outreach services. A program focusing on the teenager which encourages an improved health status and a healthful lifestyle including physical promotion of mental, social, spiritual and economic health through education, exercise, nutrition and health promotion.

94. Tobacco treatment/cessation program. Organized hospital services with the purpose of ending tobacco-use habits of patients addicted to tobacco/nicotine.

95. Transplant services. The branch of medicine that transfers an organ or tissue from one person to another or from one body part to another, to replace a diseased structure or to restore function or to change appearance. Services could include: Bone marrow, heart, lung, kidney, intestine, or tissue transplant. Please include heart/lung or other multi-organ surgeries in ‘other’.

96. Transportation to health facilities. A long-term care support service designed to assist the mobility of the elderly. Some programs offer improved financial access by offering reduced rates and barrier-free buses or vans with ramps and lifts to assist the elderly or people with disabilities; others offer subsidies for public transport systems or operate mini-bus services exclusively for use by senior citizens.

97. Urgent care center. A facility that provides care and treatment for problems that are not life threatening but require attention over the short term.

98. Violence Prevention

a. Workplace. A violence prevention program with goals and objectives for preventing workplace violence against staff and patients.

b. Community. An organized program that attempts to make a positive impact on the type(s) of violence a community is experiencing. For example, it can assist victims of violent crimes, e.g., rape, or incidents, e.g., bullying, to hospital or to community services to prevent further violent behavior or retaliation. A program that targets the underlying circumstances that contribute to violence such as poor housing, insufficient job training, and/or substance abuse through means such direct involvement and support, education, mentoring, anger management, crisis intervention and training programs would also qualify.

99. Virtual colonoscopy. Noninvasive screening procedure used to visualize, analyze and detect cancerous or potentially cancerous polyps in the colon.

100. Volunteer services department. An organized hospital department responsible for coordinating the services of volunteers working within the institution.

101. Women's health center/services. An area set aside for coordinated education and treatment services specifically for and promoted to women as provided by this special unit. Services may or may not include obstetrics but include a range of services other than OB.

102. Wound management services. Services for patients with chronic wounds and nonhealing wounds often resulting from diabetes, poor circulation, improper seating and immunocompromising conditions. The goals are to progress chronic wounds through stages of healing, reduce and eliminate infections, increase physical function to minimize complications from current wounds and prevent future chronic wounds. Wound management services are provided on an inpatient or outpatient basis, depending on the intensity of service needed.

103. Physician arrangements. An integrated healthcare delivery program implementing physician compensation and incentive systems for managed care services.

a. Independent practice association (IPA). A legal entity that holds managed care contracts. The IPA then contracts with physicians, usually in solo practice, to provide care either on a fee-for-service or capitated basis. The purpose of an IPA is to assist solo physicians in obtaining managed care contracts.

b. Group practice without walls. Hospital sponsors the formation of, or provides capital to physicians to establish, a “quasi” group to share administrative expenses while remaining independent practitioners.

c. Open physician-hospital organization (PHO). A joint venture between the hospital and all members of the medical staff who wish to participate. The PHO can act as a unified agent in managed care contracting, own a managed care plan, own and operate ambulatory care centers, own and operate specialty services projects, or provide administrative services to physician members.

d. Closed physician-hospital organization (PHO). A PHO that restricts physician membership to those practitioners who meet criteria for cost effectiveness and/or high quality.

e. Management services organization (MSO). A corporation, owned by the hospital or a physician/hospital joint venture, that provides management services to one or more medical group practices. The MSO purchases the tangible assets of the practices and leases them back
as part of a full-service management agreement, under which the MSO employs all non-physician staff and provides all supplies/administrative systems for a fee.

f. **Integrated salary model.** Physicians are salaried by the hospital or another entity of a health system to provide medical services for primary care and specialty care.

g. **Equity model.** Allows established practitioners to become shareholders in a professional corporation in exchange for tangible and intangible assets of their existing practices.

h. **Foundation.** A corporation, organized either as a hospital affiliate or subsidiary, which purchases both the tangible and intangible assets of one or more medical group practices. Physicians remain in a separate corporate entity but sign a professional services agreement with the foundation.

104. Of all physician arrangements listed in question 103 (a-i), indicate the total number of physicians (count each physician only once) that are engaged in an arrangement with your hospital that allows for joint contracting with payors or shared responsibility for financial risk or clinical performance between the hospital and physician (arrangement may be at the hospital, system or network level). **Joint contracting** does not include contracting between physicians participating in an independent practice.

105. **Joint venture.** A contractual arrangement between two or more parties forming an unincorporated business. The participants in the arrangement remain independent and separate outside of the venture’s purpose.

106. **Accountable Care Organization (ACO) Contract.** An ACO contract has two essential elements: (1) accountability for the total costs of care for the population of patients attributed to the primary care physicians in the organization; (2) financial incentives that link the magnitude of bonus payments to performance on quality measures (which could include technical quality, patient experience and/or health outcome measures) This will generally involve a contract where the payer establishes a target budget for one or more years for the total costs of care for the agreed-upon patient population, the payor tracks actual spending and performance on quality; and the provider receives bonus payments that could include a share of savings that are (or are not) contingent on meeting quality targets, with (or without) additional bonuses related to performance on those quality measures.

107. **Patient-Centered Medical Home.** The medical home concept refers to the provision of comprehensive primary care services that facilitates communication and shared decision-making between the patient, his/her primary care providers, other providers, and the patient’s family.

108. **Bundling.** Bundling is a payment mechanism whereby a provider entity receives a single payment for services provided across one or parts of the care continuum. For example, an entity might receive a single payment for the hospital and physician services provided as part of an inpatient stay or might receive a single payment for the post-acute care services involved in a single episode of care. The entity then has responsibility for compensating each of the individual providers involved in the episode of care.

111. **Capitation.** An at-risk payment arrangement in which an organization receives a fixed prearranged payment and in turn guarantees to deliver or arrange all medically necessary care required by enrollees in the capitated plan. The fixed amount is specified within contractual agreements between the payor and the involved organization. The fixed payment amount is based on an actuarial assessment of the services required by enrollees and the costs of providing these services, recognizing enrollees’ adjustment factors such as age, sex, and family size.

112. **Shared risk payments.** A payment arrangement in which a hospital and a managed care organization share the risk of adverse claims experience. Methods for sharing risk could include: capitation with partial refunds or supplements if billed hospital charges or costs differ from capitated payments, and service or discharge-based payments with withholds and bonus payouts that depend on expenditure targets.

116. **Quality/Safety Survey.** Examples of a patient safety culture survey are the Safety Attitudes Questionnaire and the AHRQ Hospital Survey on Patient Safety Culture. Impromptu surveys of only certain staff or units, and other narrowly based initiatives do not qualify as quality/safety surveys for the purpose of this question.

**SECTION D**

**TOTAL FACILITY BEDS, UTILIZATION, FINANCES, AND STAFFING**

Instructions and Definitions

For the purposes of this survey, a nursing home type unit/facility provides **long-term care for the elderly or other patients requiring chronic care** in a non-acute setting in any of the following categories: *Skilled nursing care *Intermediate care *Other long-term care (see page 16) The nursing home type unit/facility is to be owned and operated by the hospital. Only one legal entity may be vested with title to the physical property or operate under the authority of a duly executed lease of the physical property.

1. **a. Total licensed beds.** Report the total number of beds authorized by the state licensing (certifying) agency.

   b. **Beds set up and staffed.** Report the number of beds regularly available (those set up and staffed for use) at the end of the reporting period. Report only operating beds, not constructed bed capacity. Include all bed facilities that are set up and staffed for use by inpatients that have no other bed facilities, such as pediatric bassinets, isolation units and quiet rooms. Exclude newborn bassinets and bed facilities for patients receiving special procedures for a portion of their stay and who have other bed facilities assigned to or reserved for them. Exclude, for example, labor room, post anesthesia, or postoperative recovery room beds, psychiatric holding beds, observation beds, and beds that are used only as holding facilities for patients prior to their transfer to another hospital.

   c. **Bassinets set up and staffed.** Report the number of normal newborn bassinets. Do not include neonatal intensive care or intermediate care bassinets. These should be reported on page 3, C6 and C7.

   d. **Births.** Total births should exclude fetal deaths.

   e. **Admissions.** Include the number of adult and pediatric admissions (exclude births). This figure should include all patients admitted during the reporting period, including neonatal and swing admissions.

   f. **Inpatient days.** Report the number of adult and pediatric days of care rendered during the entire reporting period. Do not include days of care rendered for normal infants born in the hospital, but do include those for their mothers. Include days of care for infants born in the hospital and transferred into a neonatal care unit. Also include swing bed inpatient days. An inpatient day of care (also commonly referred to as a patient day or a census day, or by some federal hospitals as an occupied bed day) is a period of service between the census-taking hours on two successive calendar days, the day of discharge being counted only when the patient was admitted the same day.

   g. **Emergency department visits.** Should reflect the number of visits to the emergency unit. Emergency outpatients can be admitted to the inpatient areas of the hospital, but they are still counted as emergency visits and subsequently as inpatient admissions.

   h. **Total outpatient visits.** A visit by a patient who is not lodged in the hospital while receiving medical, dental, or other services. Each appearance of an outpatient in each unit constitutes one visit regardless of the number of diagnostic and/or therapeutic treatments that the patient receives. Total outpatient visits should include all clinic visits, referred visits, observation services, outpatient surgeries (also reported on line D1k), home health service visits, and emergency department visits (also reported on line D1g).

   Clinic visits should reflect total number of visits to each specialized medical unit that is responsible for the diagnosis and treatment of patients on an outpatient, nonemergency basis. (e.g., alcoholism, dental, gynecology.) Visits to the satellite clinics and primary group practices should be included if revenue is received by the hospital.

   **Referred visits** should reflect total number of outpatient ancillary visits to each specialty unit of the hospital established for providing technical aid used in the diagnosis and treatment of patients. Examples of such units are diagnostic radiology, EKG, pharmacy, etc.

   **Observation services** are those services furnished on a hospital’s premises, including use of a bed and periodic monitoring by a hospital’s nursing
### 2a2. Managed Care Medicare Discharges
A discharge day where a Medicare Managed Care Plan is the source of payment.

### 2b2. Managed Care Medicare Inpatient Days
An inpatient day where a Medicare Managed Care Plan is the source of payment.

### 2c2. Managed Care Medicaid Discharges
An inpatient day where a Medicaid Managed Care Plan is the source of payment.

### 3a. Net patient revenue
Reported at the estimated net realizable amounts from patients, third-party payors, and others for services rendered, including estimated retroactive adjustments under reimbursement agreements with third-party payors. Retroactive adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods, as final settlements are determined.

### 3b. Tax appropriations
A predetermined amount set aside by the government from its taxing authority to support the operation of the hospital.

### 3c. Other operating revenue
Revenue that arises from the normal day-to-day operations from services other than health care provided to patients. Includes sales and services to nonpatients, and revenue from miscellaneous sources (rental of hospital space, sale of cafeteria meals, gift shop sales). Also include operating gains in this category.

### 3d. Nonoperating revenue
Includes investment income, extraordinary gains and other nonoperating gains.

### 3e. Total revenue
Add net patient revenue, tax appropriations, other operating revenue and nonoperating gain.

### 3f. Payroll expenses
Include payroll for all personnel including medical and dental residents/interns and trainees.

### 3g. Employee benefits
Includes social security, group insurance, retirement benefits, workman's compensation, unemployment insurance, etc.

### 3h. Depreciation expense (for reporting period only)
Report only the depreciation expense applicable to the reporting period. The amount should also be included in accumulated depreciation (D7b).

### 3i. Interest expense
Report interest expense for the reporting period only.

### 3j. Pharmacy Expense
Includes the cost of drugs and pharmacy supplies requested to patient care departments and drugs charged to patients.

### 3k. Supply expense
The net cost of all tangible items that are expenses included in freight, standard distribution cost, and sales and use tax minus rebates. This would exclude labor, labor-related expenses and services as well as some tangible items that are frequently provided as part of labor costs.

### 3l. All other expenses
Any facility expenses not included in 3f-3k.

### 5a. Bad debt
The provision for actual or expected uncollectibles resulting from the extension of credit. Report as a deduction from gross revenue. For Question 6 (Revenue by payer), if you cannot break out your bad debt by payer, deduct the amount from self-pay.

### 5b. Financial Assistance (Includes Charity care)
Financial assistance and charity care refer to health services provided free of charge or at reduced rates to individuals who meet certain financial criteria. For purposes of this survey, charity care is measured on the basis of revenue forgone, at full-established rates.

### 5d. Medicaid Provider Tax, Fee or Assessment
Dollars paid as a result of a state law that authorizes collecting revenue from specified categories of providers. Federal matching funds may be received for the revenue collected from providers and some or all of the revenues may be returned directly or indirectly back to providers in the form of a Medicaid payment.

### 6. REVENUE BY PAYER

#### 6a1. Medicare
Should agree with the Medicare utilization reported in questions D2a1-D2b2.

#### 6a1c. Total
Medicare revenue (add Medicare fee for service patient revenue and Medicare managed care revenue).

#### 6a2. Medicaid
Should agree with Medicaid utilization reported in questions D2c1-D2d2.

#### 6a2a. Fee for service patient revenue
Do not include Medicaid disproportionate share payments (DSH) or other Medicaid supplemental payments.

#### 6a2c. Medicaid disproportionate share payment (DSH)
DSH minus associated provider taxes or assessments. Report in ‘Net’ column only.

#### 6a2d. Medicaid supplemental payments
Supplemental payments the Medicaid program pays the hospital that are NOT Medicaid DSH, minus associated provider taxes or assessments. Report in ‘Net’ column only.

#### 7a-c. Fixed Assets
Represent land and physical properties that are consumed or used in the creation of economic activities by the health care entity. The historical or acquisition costs are used in recording fixed assets. Net plant, property, and equipment represent the original costs of these items less accumulated depreciation and amortization.

### 7d. Gross Square Footage
Include all inpatient, outpatient, office, and support space used for or in support of your health care activities.

### 8. Capital Expenses
Expenses used to acquire assets, including buildings, remodeling projects, equipment, or property.

### 9. Information Technology

#### a. IT Operating expense
Exclude department depreciation and operating dollars paid against capital leases.

#### b. IT Capital expense
Include IT capital expense for the current year only. Any capital expense that is carried forward from the previous year should be excluded from this figure. Include IT related capital included in the budget of other departments. (e.g., lab, radiology) If known or can be reasonably estimated. Include the total value of capital leases to be signed in the current year.

#### c. Number of Employed IT staff (in FTEs)
Number of full-time equivalent (FTE) staff employed in the IT department/organization and on the hospital payroll.

#### d. Total number of outsourced IT staff (in FTEs)
i.e., contracted staff.

#### e. Electronic Health Record
An electronic health record (EHR) integrates electronically originated and maintained patient-level clinical health information, derived from multiple sources, into one point of access. An EHR replaces the paper medical record as the primary source of patient information.
10. Full-Time Equivalent (FTE) is the total number of hours worked by all employees over the full 12-month reporting period, divided by the normal number of hours worked by a full-time employee for that same time period. For example, if your hospital considers a normal workweek for a full-time employee to be 40 hours, a total of 2,080 would be worked over a full year (52 weeks). If the total number of hours worked by all employees on the payroll is 208,000, then the number of full-time equivalents (FTE) is 100 (employees). The FTE calculation for a specific occupational category such as registered nurses is exactly the same. The calculation for each occupational category should be based on the number of hours worked by staff employed in that specific category.

a. Physicians and dentists. Include only those physicians and dentists engaged in clinical practice and on the payroll. Those who hold administrative positions should not be reported in all other personnel. (10m)

b. Other personnel. A trainee is a person who has not completed the necessary requirements for certification or met the qualifications required for full salary under a related occupational category. Exclude medical and dental residents/interns who should be reported on line 10c.

c. Registered nurses. Nurses who have graduated from approved schools of nursing and who are currently registered by the state. They are responsible for the nature and quality of all nursing care that patients receive. Do not include any registered nurses more appropriately reported in other occupational categories, such as facility administrators, and therefore listed under all other personnel. (10m)

d. Licensed professional (vocational) nurses. Nurses who have graduated from an approved school of practical (vocational) nursing who work under the supervision of registered nurses and/or physicians. (10m)

e. Nursing assistant personnel. Certified nursing assistant or equivalent unlicensed staff who assist registered nurses in providing patient care related services as assigned by and under the supervision of a registered nurse. (10m)

h. Laboratory technicians. Technical positions in imaging fields, including, but not limited to, radiology, sonography, nuclear medicine, radiation therapy, CT, MRI. (10m)

j. Respiratory Therapists. An allied health professional who specializes in scientific knowledge and theory of clinical problems of respiratory care. Duties include the collection and evaluation of patient data to determine an appropriate care plan, selection and assembly of equipment, conduct of therapeutic procedures, and modification of prescribed plans to achieve one or more specific objectives. (10m)

m. All other personnel. This should include all personnel not already accounted for in other categories. (10m)

n. Total facility personnel. Add 10a-10m. Includes the total facility personnel - hospital plus nursing home type unit/facility personnel (for those hospitals that own and operate a nursing home type facility.) (10m)

o. Nursing home type unit/facility personnel. These lines should be filled out only by hospitals that own and operate a nursing home type unit/facility, where only one legal entity is vested with title to the physical property or operates under the authority of a duly executed lease of the physical property. If nursing home type unit/facility personnel are reported on the total facility personnel lines (10a-m), but cannot be broken out, please write “cannot break out” on this line.

q. Direct patient care RN. Registered nurses providing care directly to patients. Direct patient care responsibilities are patient-centered nursing activities carried out in the presence of the patient (such as admission, transfer/discharge, patient teaching, patient communication, treatments, counseling, and administration of medication). (10m)

r. Staffing. The total number of physicians (by type) on the medical staff with privileges except those with courtesy, honorary and provisional privileges. Do not include residents or interns. Physicians that provide only non-clinical services (administrative services, medical director services, etc.) should be excluded.

Employed by your hospital. Physicians that are either direct hospital employees or employees of a hospital subsidiary corporation. (10m)

Individual contract. An independent physician under a formal contract to provide services at your hospital including at outpatient facilities, clinics and offices. (10m)

Group contract. A physician that is part of a group (group practice, faculty practice plan or medical foundation) under a formal contract to provide services at your hospital including at inpatient and outpatient facilities, clinics and offices. (10m)

Not employed or under contract. Other physicians with privileges that have no employment or contractual relationship with the hospital to provide services. (10m)

The sum of the physicians reported in 11a-11f should equal the total number of privileged physicians in the hospital.

11a. Primary care. A physician that provides primary care services including general practice, general internal medicine, family practice, general pediatrics, obstetrics/gynecology and geriatrics. (10m)

11b. Emergency medicine. Physicians who provide care in the emergency department. (10m)

11c. Hospitalist. Physicians whose primary professional focus is the care of hospitalized medical patients (through clinical, education, administrative and research activity). (10m)

11d. Intensivist. A physician with special training to work with critically ill patients. Intensivists generally provided medical-surgical, cardiac, neonatal, pediatric and other types of intensive care. (10m)

11e. Radiologist/pathologist/anesthesiologist. Radiologist. A physician who has specialized training in imaging, including but not limited to radiology, sonography, nuclear medicine, radiation therapy, CT, MRI. Pathologist. A physician who examines samples of body tissues for diagnostic purposes. Anesthesiologist. A physician who specializes in administering medications or other agents that prevent or relieve pain, especially during surgery. (10m)

11f. Other specialist. Other physicians not included in the above categories that specialize in a specific type of medical care. (10m)

14a. Advanced Practice Registered Nurses. Registered nurses with advanced didactic and clinical education, knowledge, skills, and scope of practice. Includes: Physician assistant. A healthcare professional licensed to practice medicine with supervision of a licensed physician. Nurse practitioner. A registered nurse with at least a master's degree in nursing and advanced education in primary care, capable of independent practice in a variety of settings. Clinical nurse specialist (CNS). A registered nurse who, through a formal graduate degree (masters or doctorate) CNS education program, has expertise in a specialty area of nursing practice. CNSs are clinical experts in the diagnosis and treatment of illness, and the delivery of evidence-based nursing interventions. (10m)

14b. Primary care. Medical services including general practice, general internal medicine, family practice, general pediatrics, obstetrics/gynecology. (10m)

15a. Emergency department. The provision of unscheduled outpatient services to patients whose conditions require immediate care in the emergency department setting. (10m)

Other speciality care. A clinic that provides specialized medical care beyond the scope of primary care. (10m)

15b. Patient education. Goals and objectives for the patient and/or family related to therapeutic regimens, medical procedures and self-care. (10m)

15c. Case management. A system of assessment, treatment planning, referral and follow-up that ensures the provision of comprehensive and continuous services and the coordination of payment and reimbursement for care. (10m)

Other. Any type of care other than those listed above. (10m)

15d. Foreign-educated nurses. Individuals who are foreign born and received basic nursing education in a foreign country. In general many of these nurses come to the US on employment-based visas which allow them to obtain a green card.
SECTION E. SUPPLEMENTAL INFORMATION

DEFINITIONS

1. **Satellite facility.** Services are available at a facility geographically remote from the hospital campus.

2. **Group Purchasing Organization.** An organization whose primary function is to negotiate contracts for the purpose of purchasing for members of the group or has a central supply site for its members.

3. **Distributor.** An entity that typically does not manufacture most of its own products but purchases and re-sells these products. Such a business usually maintains an inventory of products for sales to hospitals and physician offices and others.

4. **Types of Partnerships:**
   a. Health care providers outside your system (Include other hospitals health care systems, FQHCs, community clinics)
   b. Local or state public health organizations (Include public health departments, institutes, etc.)
   c. Local or state human/social service organizations (Include food, housing/rental assistance, energy assistance, transportation assistance)
   d. Local or state government (Include municipal, city or county government, including public safety and policy/legislative initiatives at a local level)
   e. Non-profit organizations (Include National health associations, United Way, YMCA, Service leagues, healthy communities coalitions)
   f. Faith-based organizations
   g. Health insurance companies
   h. Schools (Include childhood, primary and secondary schools and colleges/universities)
   i. Local businesses or chambers of commerce
   j. Other (list)

5. Scale of partnerships:
   a. Not involved. No current partnerships with this type of organization
   b. Collaboration. Exchange information and share resources for a similar mission to enhance the capacity of the other partner
   c. Formal Alliance. Formalized partnership (binding agreement) among multiple organizations with merged initiatives, common goals and metrics
